To Whom It May Concern:

If you are receiving this letter it is because you have taken an action that is a violation of Federal Law. It is unlawful for your institution to mandate that students or faculty wear masks, take PCR tests or be vaccinated for Covid19. All of the above have only been authorized, not approved, for Emergency Use Authorization only. Where they are to be used, Title 21 U.S.C., section 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act requires that any individual who is to receive any of the above be made aware of the potential benefits and risks associated with such and whether such are even known, and that the individual has the right to accept or refuse administration of the product together with any alternatives to the product and of their benefits and risks. In plain English, your students and faculty have a right of Informed Consent and if they do not give that consent they cannot be required to comply with your mandates. Further, because these matters involve the health of your students and faculty it is not lawful for you to inquire about whether they have received any of the experimental "vaccines".

HAVE YOU PROVIDED THE INFORMATION REQUIRED BY THE LAW FOR EACH STUDENT AT YOUR INSTITUTION? Your students have a RIGHT of INFORMED CONSENT.

If you fail to retract the requirement that your students are required to receive one of the experimental Covid19 "vaccines" authorized only for emergency use without their informed consent you will be sued. You will not only be sued for an order restraining you from violating the law as set forth herein above, you will eventually be sued for damages. Just imagine for a moment how much liability you are about to assume by destroying the future earnings of the brightest among us just as they racked up a pile of debt by paying your institution to get **almost** educated and then cannot realize the benefits of their education due to your actions. They are young and it does not take a rocket scientist to do the math to show the losses from their reduced incomes for the next 40 years had they been earning money with their full education and licenses. That's right, we are talking about millions of dollars for EACH student.

This is the only warning you will receive from me – you should govern yourselves, accordingly.

Carl Schwartz, Esq.
